

Lab 1: Basic Python

Due date: Sunday January 19, 11:59pm

1. During the lab we will look into basic python operations using the google class at <https://developers.google.com/edu/python>. To finish the lab you will need to do at least
 - Introduction
 - Strings
 - Lists
2. You will need to expand on the python files string1.py, string2.py, and list1.py. these can be downloaded from here: <https://developers.google.com/edu/python/exercises/basic>.
3. Package the file string1.py, string2.py, and list1.py into a folder with your lastname and then compress the folder into a lastname.zip archive.
4. Upload the zip file to canvas before the deadline, Tara should be able to test your work by simply running a script such as

```
unzip beerli1.zip
cd beerli1
python string1.py
python string2.py
python list1.py
```
